

Pricing for White Label Email Forwarding Customers

Monthly Volume	Message Cost
under 100,000	\$80/month
100,000 - 500,000	\$60/100,000
500,000 - 5 million	\$400/million
5 million - 10 million	\$320/million
10 million - 20 million	\$260/million
20 million +	\$200/million

Charges are payable monthly. The first month uses estimated volume; subsequent months use actual prior month's usage going forward, like mobile phone billing.

All white label accounts include access to an administrator dashboard, where you can:

- Review mail volume
- Set up new API passwords
- Edit individual forwarding address settings
- Exempt email addresses, domains or IP/IP range from spam filtering (whitelists)
- Pay your bill

If your users have access to an existing web interface, our API allows you to integrate email forwarding setup into your web interface. This allows users to update their own forwarding settings, real time.

As much as possible, messages identified as spam will be rejected (bounced) by the Pobox mail server, so message senders know the mail was not delivered. Our technical team are happy to provide advice for adjusting spam filters as needed based on your users' mail behavior.

Billed volume includes messages both forwarded and rejected by spam filters. Messages rejected as "user unknown" are not included in the volume total.
