

Volume-Based Pricing for Email Forwarding Clients

Monthly Volume	Message Cost
under 100,000	\$80/100,000
100,00 - 500,000	\$60/100,000
500,000 - 5 million	\$400/million
5 million - 10 million	\$320/million
10 million - 20 million	\$260/million
20 million +	\$200/million

In addition to our best practice spam filters, client administrators can connect to the dashboard to add whitelists, either by email address, domain or IP/IP range. Consultations are available for tuning and adjusting spam filters on an as-needed basis.

Insofar as possible, all messages identified as spam will be rejected (bounced) by the Pobox mail server, so the message sender is aware the mail was not delivered. Due to the requirements of ISPs, all forwarded mail must be spam filtered unless it is being delivered exclusively to your own in-house mail servers.

Message volume includes messages both forwarded and bounced by spam filters. Messages bounced “user unknown” are not included in the volume total.

Volume charges are payable monthly. Bills are generated using an initial estimated payment, then actual prior month’s usage going forward, a la mobile phone billing.
